# California School District Financial Reporting Requirements

- Education Code 42130 – requires the school district to file their fiscal condition for TWO reporting periods, October 31 and January 31, including projections of the budget through June 30.
- Education Code 42131 – requires the Board of Education to certify, based on current projections, whether or not the school district is able to meet its financial obligations for the current fiscal year and subsequent two fiscal years.
- Education Code 33127 – requires a district that has received a negative certification of its interim report(s) to file a third report as of April 30.

# Financial Reporting Certifications

There are three types of certification based on the multi-year projections at each reporting period.

- Positive Certification ~ District can meet it's financial obligations for the current and two subsequent years.
- Qualified Certification ~ borderline, may not meet financial obligations during one of the three years of the MYP.
- Negative Certification ~ cannot meet financial obligations in two or more of the three years as shown by negative fund balance, insufficient Reserves for Economic Uncertainty.

# Future Considerations/Risk

- Uncertainty in Future State Budget, LAO's economic forecast provides 2 scenarios: growth & recession
- Uncertainty in Revenue Increases: LCFF 100% implemented, COLAs are not guaranteed
- Declining enrollment and ADA
- Uncertainty in unrestricted one-time funding
- Continued cost increases associated with pension & operating increases and less reliance on revenue increases
- Maintaining adequate reserves to satisfy obligations in all years
