Line	Qty	Description	Unit Price	Ext. Price
16	1	Cabling	\$27,000.00	\$27,000.00

Task: 01 Perform the following tasks as detailed in the District Network Assessment Overview and Scope of Work section 7.b:

Conduct site Inspections at ten (10) District sites to be selected by MDUSD, to include the main central administrative center (Dent), and the Maintenance and Operations / Transportation / Warehouse campus:

Conduct high-level field inspections of existing buildings at ten (10) District locations. The district will provide infrastructure information for the other forty seven (47) sites. The field inspections will include:

Review of observable inter-building low-voltage conduit pathways between primary buildings, providing digital picture documentation and relevant text explanation of findings and critical issues, which will include but not necessarily be limited to location, routing, size, condition and suitability for probable future requirements; types of cables (i.e., single-mode fiber, multi-mode fiber, copper, coax). This work effort will NOT include any consultant entry into manholes, vaults, steam tunnels, ceiling spaces, etc., but may include inspection via these.

Inspection of entrance facilities into each primary building, providing digital picture documentation and relevant text explanation of findings and critical issues, which will include but not necessarily be limited to location, size, condition and suitability of rooms; observable conduit quantities, sizes, conditions, % cable fills; types of cables (i.e., single-mode fiber, multi-mode fiber, copper, coax); and nature and condition of cable terminations.

Inspection of representative telecom rooms (i.e., MDFs, BDFs and IDF), providing digital pictures and relevant explanation of findings and critical issues, which will include but not necessarily be limited to location, size, condition and suitability of rooms; observable conduit quantities, sizes, conditions, % cable fills; types of cables (i.e., single-mode fiber, multi-mode fiber, copper, coax); and nature and condition of cable terminations.

Inspection of representative cabling at ten (10) sites.

Please note that the following assumptions have been made:

- " All work will be performed during normal business hours.
- " The District will provide maps for each campus detailing the location of each MDF/IDF/MPOE.
- " The District will provide access to each MDF/IDF/MPOE.
